Portfolio: rahul-borugadda-portfolio.vercel.app

Professional Summary

Motivated B.Tech graduate (2025) with strong programming fundamentals and hands-on experience in full-stack and automation-driven applications. Seeking an entry-level role to contribute to system development, support automation initiatives, and build scalable enterprise solutions using modern digital technologies. Eager to collaborate with cross-functional teams and deliver impactful solutions.

Education

Bachelor of Technology – Artificial Intelligence and Data Science

Nov 2021 – Jun 2025

Vasireddy Venkatadri Institute of Technology, Guntur, India

CGPA: 7.60 / 10

Relevant Coursework: Full Stack Development, Web Technologies, Database Management, Machine Learning

Projects

Legal Text Classification System

Dec 2024 – Feb 2025

Academic Project

- Developed an NLP-based system to classify legal documents using machine learning techniques.
- Applied text preprocessing and transformer-based models on real-world legal datasets.
- Built a web interface for real-time classification achieving over 90% accuracy.
- Technologies: Python, NLP, Flask, Transformers

AI SQL Assistant using LLM

May 2025 – Jun 2025

Personal Project

- Built a natural language to SQL conversion system using large language models.
- Developed a Streamlit-based interface for querying structured datasets.
- Supported CSV, Excel, MongoDB, MySQL, and Snowflake integrations.
- Technologies: Python, Streamlit, SQL, Pandas

Formula One Data Analytics Platform

Jul 2025

Personal Project

- Full-stack application analyzing F1 racing data with interactive dashboard.
- Built REST API and data visualization components for comprehensive sports analytics.
- Combined web development skills with data analysis capabilities for real-time insights.
- Technologies Used: Next.js, TypeScript, Python, Flask, MongoDB

Visionary – Multi-Agent Creative Studio

Nov 2025

Personal Project

- Architected a hierarchical multi-agent system using the Google Agent Development Kit (ADK), orchestrating Gemini 2.5 Pro to autonomously decompose abstract user briefs into technical execution plans for specialized sub-agents.
- Built a state-aware agent backend using InMemoryRunner, ensuring data consistency (Asset IDs and prompts) is maintained across a multi-step generation pipeline from text-to-image to image-to-video.
- Implemented secure asset retrieval for remote Google Cloud Storage resources by engineering a Signed URL injection mechanism, allowing the frontend to display protected assets generated by the Veo 3.0 model.
- Technologies Used: Python, Google ADK, Google Gen-AI, Flask, React, Gemini 2.5 Pro, Veo 3.0, Imagen.

Merch Master – Product Photography Companion

Dec 2025

Personal Project

- Built an AI-driven product mockup platform that generates realistic, context-aware designs by leveraging Google Gemini image models to account for lighting, surface texture, perspective, and camera angles.
- Designed an interactive drag-and-drop canvas and engineered logic to translate user interactions (positioning, scaling, layering) into structured, AI-consumable prompts for accurate visual generation.
- Technologies: Python, Google ADK, Generative AI, Flask, React

Technical Skills

Programming Languages: Python, JavaScript, Java, HTML, CSS

Frontend Technologies: React, Next.js, TypeScript, Tailwind CSS

Backend Technologies: Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, Visual Studio Code, Jupyter Notebook

Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability

Experience

Data Science Intern

Apr 2025 – July 2025

CODTECH IT SOLUTIONS

- Completed 3-month structured internship program in data science fundamentals.
- Developed stock price prediction model using Python and machine learning algorithms.
- Created data analysis reports and visualizations using Pandas, NumPy, and Matplotlib.
- Gained practical experience in end-to-end data science project lifecycle.

Internships and Certifications

AI Agents Intensive Course With Google

Dec 2025

A 5 Day Coursework held by Google and Kaggle giving me exposure to how AI Agents work, act and scale.

Salesforce Developer Virtual Internship

May 2024 – Jun 2024

Exposure to CRM platforms, cloud automation, and data management.

Introduction to MongoDB – MongoDB University

May 2024

Training in NoSQL design, indexing, and aggregation pipelines.

SQL for Data Science – Great Learning

Sep 2024

Hands-on training in SQL queries and data analysis.
